OBJECTIVE

I'm a junior new Full stack Developer looking for a change in career, having just received my certificate of completion from the coding bootcamp at University of California in Irvine's school of continuing education. My skills include (but are not limited to) JavaScript, HTML, CSS, REACT, express, node, git, MySQL, and NoSQL. I can work as part of a team in a fast-paced environment to both learn new skills and create responsive and functional full stack web applications.

EXPERIENCE

Integrated Dental Systems - Biotech Dental

March 2018 – May 2019

October 2020 – March 2023

Customer Service

My duties as a customer service representative encompassed much more than just customer service work. This includes, but is not limited to technical support and IT. As a customer service agent, I facilitated the order fulfillment processes through operations and supply chain to ensure on-time delivery of products and high customer satisfaction. I also fielded calls on product complaints and questions, servicing the customer to best remedy their often-urgent healthcare issue. My technical specialty lied on the implant restoration side, where I would help doctors with prosthetic questions and aid dental labs and technicians with CAD/CAM, specifically for our product. My job often required me to assist other team members by helping implement and teach new software and technical routine additions, this was ever more relevant as much of the product is moving into the digital environment. Product knowledge and standard procedural familiarity were crucial in my everyday work for dissemination and training of sales reps and distributing partners who are often unfamiliar with our ever-evolving catalog and services offered, in addition to the increased customer satisfaction that it normally yielded.

MHP Structural Engineers

July 2019- September 2020

Office Clerk

My position as an office assistant and clerk at MHP had me attend to several duties. Most of my time was spent facilitating workflow in the office and maintaining schedules for many of the engineers and project managers. Some of my other duties included creating photo documents/reports for the due diligence team, assisting accounting in updating job statuses as well as creating "jobs", and assisting the director of new business in establishing potential client and partner relationships as well as helping to maintain the status of established relationships. I worked on projects as assigned to me by the partners there which can range from helping set up meetings in or out of the office to making sure all of the existing contracts were up to date/being fulfilled.

Power 9

June 2016- February 2017

Owner (sold)

From June 2016 until February 2017 opened and operated a small business in Signal Hill, CA. The business was a hobby store. The new endeavor required me to learn an entire slew of new skills at quick rate on my own in order to open and maintain smooth operations. During this venture I handled the incorporation of our business, as well as all the finances and taxes this includes working with financial institutions to set up merchant accounts and point of sales. I negotiated the lease and dealt with and negotiated with the with the local supply chain distributor for favorable terms and pricing on products for resale. I even occasionally ran the storefront, including managing POS and inventory. The venture ended when my business partner and I decided to sell in February 2017.

Dentium USA

March 2015 – January 2018

Customer Service/Inside Sales Support/Quality Associate

I worked in office for a dental implant company where my primary responsibilities were working with medical professionals, mostly dentists on the safe use of our product and customer satisfaction. Similar to my most recent position facilitated order fulfillment process through operations and supply chain to ensure on-time delivery of product. This position also allowed me to explore many other responsibilities. I eventually became a quality associate where I would inspect failed medical devices and generate reports which would then be sent to the FDA. I attended seminars, lectures and trade shows to demonstrate the uses of our products and to help train potential users. I also helped the sales team in servicing house accounts and even managed the Arizona territory remotely (with limited travel) for a short period of time. Some of my duties also included helping the accounting department with invoicing and month end sales cut off reports.

EDUCATION

Full stack coding bootcamp through UCI

Have completed the full stack coding bootcamp where I learned JavaScript, HTML, CSS, React, Express.js, Node.js, MySQL, NoSQL, and git.

Microsoft EdX – Basics in Java

Have completed the Microsoft course for basics in Java and received the accompanying certificate.

Tulane University - New Orleans, LA

2010 – 2014 School of Liberal Arts – Major: Music Science and Technology 3.76/4.00 GPA

Honors Graduated Cum Laude, Presidential Scholar, Todd G. Schwartz Endowed Scholarship Recipient,

Conference USA – Commissioner's Honor Roll 2010-2014

COURSEWORK

Music & DSP, Biomedical Electronics, Differential Equations, Audio/Visual Intermedia, Music Performance Systems, Technology and Creativity, Electric Circuits, Algorithmic Computer Music, Advanced Music Composition, Advanced Harmony, 18th/19th Tonal Analysis, 20th Century Music Theory, Orchestration

ADDITIONAL

Tulane University Track and Field

2010 – 2014 Student-Athlete

-Earned many Conference USA Honors, including Conference All-Academic first team my junior season and the Conference USA's commissioner's honor roll for all 4 years of competition
